WORK EXPERIENCE

Software Developer

Mverse Technology Pvt. Ltd.

01/2024 - Present Mumbai, India

Project: Freight Forwarding :- A web-based logistics management system designed to streamline freight forwarding operations, including shipment tracking, cargo documentation, rate management, and invoicing.

Achievements/Tasks

- Integrated multiple APIs from third-party logistics providers and freight carriers to ensure seamless tracking and updates of shipment statuses.
- Developed custom workflows that allowed users to automate and manage freight shipment processes from order creation to final delivery, improving user productivity.
- Contributed to the development of a cross-platform web application for customers to track their shipments.

Technologies Used : Dot Net Core, C#, SQL, GIT (Version Control) - Angular, JavaScript, TypeScript, Bootstrap, Material

Software Developer

Aloha Technology Pvt. Ltd.

12/2022 - 08/2023 Pune, India

Project: Precision Care :- A healthcare management platform focused on delivering personalized patient care by integrating electronic health records (EHR), care plans, and data-driven insights. The system supports clinicians in making informed decisions, enhancing treatment accuracy, patient monitoring, and overall care coordination.

Achievements/Tasks

- Developing scalable user interface using angular framework.
- Building enterprise grade software product while understanding business needs & establishing strong code quality & re-usability standards
- Understanding client requirement and delivering quality code
- Implemented reusable components using Angular to boost-up application performance

Technologies Used : Dot Net Core, C#, SQL, GIT (Version Control) - Angular, JavaScript, TypeScript, Bootstrap, Material

Software Developer

Ezzix Technology Pvt. Ltd

09/2021 - 12/2022 Pune, India

Project: Acrobuid :- A real estate management system designed to digitize property listings, automate project tracking, and streamline sales and leasing processes.

Achievements/Tasks

- Worked on salesforce CRM and developed modules such as lead generation, inventory booking, email-campaign, automation
- Gathering clients requirement and worked on day-to-day tasks
- Had worked with more than 10+ members of team for research and development
- Also checkout the website which I designed for this company - <https://ezzix.in/> (<https://ezzix.in/>)

Technologies Used : Dot Net Core, C#, SQL, GIT (Version Control) - Angular, JavaScript, TypeScript, Bootstrap, Material

PERSONAL PROJECTS

D'Profile (01/2021 - 06/2021)

- Responsibilities & Achievements:

- Designed and developed a responsive, customizable resume template feature using Angular, allowing users to create modern, dynamic resumes.
- Implemented functionality to allow users to input personal and professional details in customizable sections (e.g., work experience, education, skills, etc.).
- Developed a PDF generation module that enabled users to download their resumes in high-quality PDF format directly from the platform, improving the user experience and providing a seamless offline option.
- Built and implemented Employee Modules for the Human Resource Management (HRM) system, allowing HR managers to track employee details such as personal information, work history, and role assignments.
- **Technologies Used** :- Dot Net Core, C#, SQL, GIT (Version Control), Angular, JavaScript, TypeScript, Bootstrap, Material
