## Experinces

**Mobotics Technology (Nov 2022 – present)**

**Role:** Full-Stack Developer/Software Engineer

- ➢ **Client:** Senco
- ➢ **Project Undertaken:** Building Senco's Unified DigiGold Platform to **Buy, Sell and Redeem** digital gold using Laravel framework and MongoDB.
- ➢ **Key Highlights:**
  - o Developed and integrated a loyalty points system for gold purchases, enabling customers to earn points that are unified across all Senco platforms and redeemable from any location.
  - o Successfully designed and implemented the **Systematic Purchase Plan (SPP)** feature for structured gold investments.
  - o Successfully delivered for 2 portfolios **Gold** and **Silver** while ensuring a smooth and efficient user experience.
  - o A role-based admin panel for managing user permissions and access control, report generation, order management, and customer management.
  - o Designed, developed and optimized a **unified admin panel**, streamlining operations and enhancing platform control.
  - o Implemented a **configurable offer management section**, allowing dynamic promotional updates.
  - o Implemented **gold gifting**, where a registered user can gift gold to any registered or non-registered user.
  - o Developed a referral system allowing users to share links via social media platforms like WhatsApp and Facebook.
- ➢ **Challenges Solved**: (a) Report Download Query Speed Fixed (b) Fixed price change issue due to irregular change in rate of gold which leads to improper transactions
- ➢ **Technologies Used**: PHP, Laravel, MongoDB, Html, Css, Javascript, jQuery.
