PROJECTS

1. IOT BASED HEALTH MONITORING SYSTEM

Group Work College Project

- Conclusion of our project is that it is very much essential to measure the human body parameter which is in critical situation and
- to analyze the data, without analyzing we can't identify the exact problem
- if we analyze the data then we can treat patient more accurately more efficiently and as soon as possible.
- With the help of Wifi we can transmit that analyzed data wirelessly to doctor.

2. CODING: DEVELOPMENT & ADVANCE ENGINEERING JOB SIMULATION

Accenture Software Company

- Object Oriented Programming
- Code Refactoring
- Continuous Integration
- Agile Planning
