WORK EXPERIENCE:

Frontend Developer (React.js & React Native)
Qaswa Technologies Pvt Ltd. | Nagpur
April 2022 – Present

- I have 3+ years of experience.
- Developed and maintained cross-platform web and mobile applications using React.js and React Native.
- Built responsive, user-friendly interfaces with reusable components for optimal performance on various devices.
- Implemented state management, navigation, and API integrations to ensure seamless user experiences.
- Utilized third-party libraries, authentication flows, and real-time features to enhance functionality.
- Collaborated within agile teams, following best practices for clean code, Git-based version control, debugging, and thorough UI testing.

INTERPERSONAL SKILL:

- Strong problem-solving
- Skills Eagerness to learn
- Teamwork
- Time Management
- Attention to Detail

ADDRESS:

- Home Town : Nagpur , Maharashtra.

SUMMARY:

Frontend and Mobile App Developer with hands-on experience in React.js, React Native, JavaScript, HTML, CSS, Firebase, Tailwind CSS, and tools like Postman, VS Code, and Canva. Proficient in Node.js, Express.js, MongoDB, MySQL, Bootstrap, AWS, and Figma, with real project exposure and a strong desire to grow in backend and cloud development. Focused on creating responsive, user-friendly, and impactful digital solutions.

LIVE PROJECTS:

Full-Stack Live Projects (React, React Native, Express.js, MySQL)

- Koding_Street :-**
MERN+MySQL+React Native
Role :- Full-Stack Developer

Developed a complete learning platform with a React.js-based admin panel where admins can create student accounts, add subjects, and upload question papers. All APIs were built using Node.js and Express, with MySQL handling structured data storage. On the mobile side, students log in via the React Native app to view only the subjects assigned to them, access related question papers, and see their marks after completing the paper. The app includes a drawer navigation that displays user details, and features secure authentication, role-based access control, ensuring a smooth experience across both web and mobile interfaces.

- Anti-theft-App :**
Role :- Front-end Developer

Currently working on a mobile safety app in React Native with features like emergency alerts (SMS and calls), anti-theft mode using accelerometer sensors, seamless navigation using react-native-navigation, and custom CSS styling. Managed state efficiently with Redux and handled permissions using react-native-permissions.

- Poster-App :-**
Role :- Front-end Developer

Developed a React Native mobile app that allows users to create and customize posters with quotes, images, and design templates. Focused on building an intuitive and responsive user interface, implementing smooth navigation, and optimizing performance for a seamless user experience. Integrated dynamic content rendering, reusable components, and state management using Redux to ensure consistency and scalability across the app.

- Islamic-Ishtehar-App :-**
Role :- Front-end Developer

Contributed to the Islamic Ishtehar App by supporting the implementation of features and designing user-friendly interfaces in React Native.
