WORK EXPERIENCE

Fyntune Solutions
Software Developer
May 2024 - Present

- Developed the backend architecture for the **Claim Dashboard**, integrating and displaying comprehensive claim-related data and **APIs**, improving data accessibility by **60%**.
- Implemented the complete backend workflow for **GPA** and **GTL claims** (submission, tracking, mail communication, status updates, and MIS reports), resulting in a **40%** improvement in claim processing efficiency.
- Built the frontend interface for a lightweight **SMS Dashboard** using React.js, enhancing usability and response time for SMS operations by **30%**.
- Created the **Offline Claim Data Upload Module** for **LOL claims**, enabling seamless bulk data uploads and **reducing** manual **processing time.**
- Developed both frontend and backend modules for **Nominee Configuration** across policy types (GMC, GPA, and GTL), increasing nomination data **accuracy** by **35%**.
- Collaborated with cross-functional teams in an **Agile environment**, using technologies such as **Laravel (PHP), React.js, JavaScript**, and **MySQL**, ensuring on-time and scalable software deliveries.
