Mar 2022 – Till date

3+ Year 0 Months

Project #2:

Application : Employee Engagement Tool – HRMS Tool for Onboarding and Outsourcing
the employees.

Company : Fuelo Technologies

Technologies : Angular, Typescript, JavaScript, Html, CSS.

Roles & Responsibility:

✔️ Application development ✔️ Developed both front-end and back-end
modules for some features.

✔️ Involved in developing Authentication and Authorization.

✔️ Improvements and Bug fixes in the existing code.

✔️ Handling deployment and maintenance services.

Project Description:

Employee Engagement is a web application used for onboarding and outsourcing employees.
At the time of onboarding process new account will be created to employees for interview feedbacks
and to check for the documents and verification.

Once the employee is onboarded then to start the outsourcing employee is scheduled with interviews and if selected purchase orders will be generated and if accepted then monthly pay slips and reports will be generated.

Project #1:

Application   : Real-Estate

Company   : Fuelo Technologies

Technologies   : Angular, TypeScript, Javascript, Html, CSS.

Roles & Responsibility:

✔️ Requirement Gathering and Direct client interaction.

✔️ Application development and Integration testing.

✔️ Backend development for both Mobile and Web application

✔️ Involved in Implementation & Production Support

✔️ Handling deployment and maintenance services

Project Description:

In this Application user belonging to an office or any community or within his circle of friends will register into the app. User who creates group will be considered as an admin and then invite others into the group. So, the group user can post/buy anything by selecting the category.
