I'm a Front-End Software Developer with over 2 years of experience specializing in Angular. I've worked on impactful projects like *Accrue*, *Glabol*, and *StudioRg*, focusing on building scalable and user-friendly applications. I enjoy working in collaborative environments and constantly look for opportunities to grow my technical skills. With a B.Tech in Computer Science and Engineering, I'm passionate about clean code, modern web technologies, and solving real-world problems through intuitive design.

## WORK EXPERIENCE

### Front-End Developer Swapac Infotech PVT LTD

#### Achievements/Tasks

- 2 years of experience developing responsive web applications using Angular
- Contributed to key projects like *Accrue* (form management system) and *Glabol* (tour booking platform).
- Focused on delivering smooth user experiences, optimizing performance, and collaborating with cross-functional teams.

## PROJECTS

### Accrue Mobile App / Web

- Form Creation and Assignment: Admins can create customized forms with questions and assign them to mobile app users for completion.
- Submission and Management: Mobile users submit their answers through the app, enabling efficient data collection and management.

### Zccrue Mobile App / Web

- Form Creation and Assignment: Admins can create customized forms with questions and assign them to mobile app users for completion.
- Submission and Management: Mobile users submit their answers through the app, enabling efficient data collection and management.

### Glabol Mobile App/Web

- Glabol, a tour booking application with three panels: web app, mobile app, and admin dashboard.
- Tour Management: Admins can create and manage tours and trips, while users can view details and book tours through both the mobile and web apps.

### StudioRg

- StudioRg, an application designed for efficient asset management.
- Users can easily track and manage their assets, ensuring accurate records and streamlined operations.
