1. As an Angular developer specializing in Ticketing System Track projects, I have had the privilege of working with a NIC government client to create robust solutions for incident, problem, and change management tickets. In this role, my primary focus has been on developing user-friendly interfaces and seamless functionalities using Angular frameworks.

2. I have successfully delivered projects that streamline ticket creation, tracking, and resolution processes, ensuring that critical information is easily accessible and actionable. By implementing responsive designs and intuitive user interfaces, I have enhanced the overall user experience and productivity for both internal teams and end-users.

3. One of my notable contributions has been in enhancing the change request, problem, and knowledge management modules to ensure streamlined processes and improved decision-making capabilities.
