

SUMMARY

- Having experience in Frontend Web Application Development and Hybrid Application Development using JavaScript, ReactJS, angular19, Nextjs13, HTML5, and CSS.
- Strong product development understanding with experience in product-based startups, including design, development, and deployment
- Skilled in designing and developing responsive web applications from UX designs and mockup screens.
- Extensive experience integrating Frontend with Backend REST APIs services.
- Proficient in using Postman and browser debugging tools for API testing, monitoring API calls, and analyzing request-response data.
- Experienced in maps, charts, and Firebase into frontend applications
- Strong communication, collaboration, and team-building skills with an aptitude for quickly learning new technologies.

SKILLS

- **Frontend:** JavaScript, angular19, nextjs13, ReactJS, React-redux, Redux Saga, shadcn, tailwind, HTML5, CSS.
- **Backend:** Express, Node.js, MongoDB, php, sql.
- **Tools and Technologies:** JIRA, Git, JSON, Postman, REST Web Services, docker.
- **Leetcode:** <https://leetcode.com/u/shivsawant1958/>.

EXPERIENCE

- **Version Next Technology Pvt Ltd - Client: Mirae Asset Capital Markets (m.Stock)** Mumbai
Software Developer Dec 2023 - Present
 - sDeveloping the mStock-2.0 web application At Mirae Asset Capital Markets.
 - Collaborating with cross-functional teams to deliver new features, improve performance, real-time data integration, and enhance the trading experience in an Agile environment.
 - Following Agile Methodology with JIRA.
- **Agarwal Packers And Movers Pvt Ltd** Mumbai
Software Developer Feb 2023 - Dec 2023
 - Dashboard And Portals For Transportation Management.
 - Collaborated with a team to design and develop client dashboards, ensuring a user-friendly experience.
 - Demonstrated strong problem-solving skills, meeting client requirements with high-quality solutions.
- **V-art Services Pvt Ltd** Mumbai
Software Developer Dec 2022 - Feb 2023
 - Enhanced and developed modules to meet client specifications
- **Eternal Jewels** Mumbai
Executive Sep 2020 - Oct 2022
 - Order Processing and Follow Ups.
- **Aura Jewels Pvt Ltd** Mumbai
Associate JuLy 2019 - Sep 2020
 - Order Processing.

Mstock 2.0 - Mirae Asset Capital Market Project

- Implemented WebSocket data handling to stream real-time market data efficiently; ensured optimal rendering with minimal latency.
- Enhanced web application performance through code optimization strategies of 1) Reusable component design to minimize duplication and improve maintainability. 2) Lazy loading of routes and components to reduce initial load time. 3) Debouncing and throttling input and scroll events to limit unnecessary re-renders and API calls.
- Collaborated in designing scalable and modular code architecture to support ongoing enhancements and new feature rollouts.
- Worked closely with backend and QA teams to ensure data accuracy, smooth integration, and performance reliability across modules.
- Worked Modules: Research and advice module, IPO module, Buyback Module, Etf Module, MTF module, Basket Module
- Technologies Used: [React.js18 / Angular19], JavaScript/TypeScript, WebSocket, REST APIs, Redux, HTML, CSS, Git, Agile Methodologies

Transportation Management - Agarwal Packers And Movers Project

- **Developed and deployed two integrated systems:** – a Dashboard for monitoring logistics operations and a Portal for managing real-time transportation data and communication.
- **Dashboard Highlights:** Centralized tracking of transportation lifecycle stages: Pending, Loading, On-loading, Unloading, Enroute, Billing, Completed, and Queries. Designed an intuitive interface for logistics managers to monitor order status and take proactive decisions. Enabled data-driven insights for operational efficiency using visual components (e.g., charts, tables, status indicators).
- **Portal Highlights:** Implemented user-friendly modules to: Update orders, track locations, and upload billing details. Add internal comments and resolve user-submitted queries efficiently. Improved cross-team collaboration by enabling real-time data updates and communication.
- **Tech stack:** –Reactjs, html, css, javascript, nextjs, expressjs, nodejs, mongodb, react-redux.

Employee Management Dashboard - Personal Project

- Built a full-stack dashboard using Next.js, Tailwind CSS, ShadCN, Node.js, Express, MongoDB, and Redis. Key features include employee sign-in/out tracking, leave management, holiday calendar, attendance history, personal notepad, announcements, birthday reminders, and data visualizations. Implemented efficient backend data handling and caching with Redis to enhance performance.

Ecommerce Dashboard - Personal Project

- Users can login, buy products, add to cart, rate products, update profile, and complete payments.
- Admins can create, update, delete products, manage users and reviews, and view a dashboard with charts displaying product, order, and user details.
- Collaborated with backend team to streamline order processing, ensuring platform integrity under high-volume conditions.

EDUCATION
