

Tender bidding
automated from
**7 DAYS TO
7 MINS**

for 

Faster bids

| Higher accuracy

| Significant cost savings

Challenges

Time-Consuming Process

A single tender takes up to 7 days. It prevents the team from pursuing multiple opportunities

Resource Heavy

Bidding required the involvement of multiple team members, from sales to technical, in repetitive tasks

Error-Prone Work

The process involved manually sifting through 100s of pages of tender documents, which is highly susceptible to human error

Missed Opportunities

The manual process made it difficult to keep track of submission deadlines and respond to new opportunities quickly

NavAI's Solution

AI-Powered Tender Analysis

BidBuddy analyzes entire tender documents in minutes, instantly flagging critical criteria like brand restrictions, financial requirements, and eligibility

Intelligent Document Preparation

Once a bid is approved, AI creates a compliant bid package. It attaches all necessary documents with near-perfect accuracy

Automated Workflow

The platform organizes the entire bidding process, from eligibility checks to document preparation and final bid submission
